Partner-Packaged Solution

# Retail Solution by Pearl

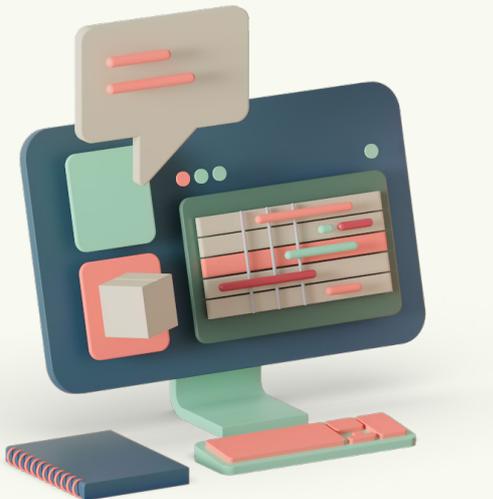

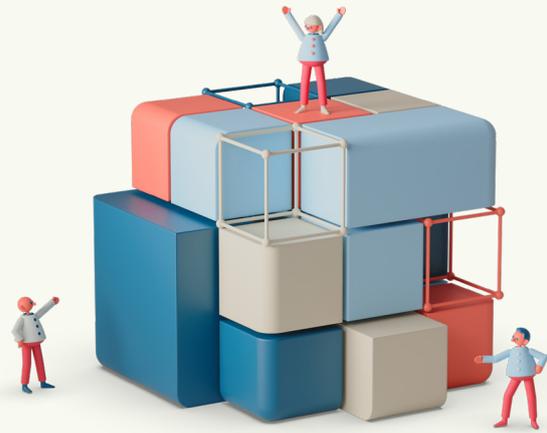

The retail industry is evolving fast. Customer demands and buying patterns are constantly changing. Retailers need to adopt the digital transformation to stay relevant and win new market shares. By implementing S/4HANA Public Cloud for Retail, a pure SaaS solution with continuous innovations, this will be achieved. S/4HANA Public Cloud will support your entire customer journey. It provides an omnichannel shopping experience, advanced demand planning, extended warehouse management functionality and flexible logistics handling. Everything seamlessly integrated with financial accounting. By choosing Pearl as a partner and implementing our SAP qualified partner-package solution you will get a ready-to-run ERP solution that supports your current and future business requirements. Delivered by the most experienced retail advisors in the market in an efficient, cost- and time-saving manner.

- Adopt digital transformation by implementing the market leading SaaS ERP solution, SAP S/4HANA Public Cloud for Retail
- Achieve continuous business and technology innovation in bi-yearly releases
- Take advantage of ready-to-run best practice processes that support your entire customer journey
- Experience higher efficiency with an easy and intuitive user experience with process automation, insight-to-action, and build-in capabilities for artificial intelligence
- Lower your TCO by utilizing a SaaS subscription model with no investments in additional hardware and infrastructure

## PACKAGE CONTENT

---

Pearl offers a qualified package solution for Retail on S/4HANA Public Cloud. SAP S/4HANA Public Cloud is comprised of ready-to-run best practice processes that supports your entire customer journey with an omnichannel shopping experience, advanced demand planning, extended warehouse management functionality and flexible logistics handling. Everything seamlessly integrated with financial accounting.

The award-winning integration platform, Integration Suite on SAP Business Technology Platform, is included in the package together with the integrations to an e-commerce solution and a POS system. Pearl can also offer the integrated POS system, PearlPOS, on request.

Learn more about PearlPOS here:  
<https://www.pearlpos.no/>

To successfully exchange documents in the electronic trading format, Pearl is offering the solution PearlEHF as part of the package solution.

The solution will be implemented in an efficient, cost- and time-saving manner by the most experienced consultants in the market specialized within the retail industry sector. After the implementation, Pearl aim to be your long-term partner where we in an addition to support your existing system landscape, help you evolve and expand your business further.

Implementation timescale: **From 19 weeks**

Pricing: **From 9990 Eur per month** over a five-year period

The implementation timescale and the pricing depend on the implementation scope, the total system landscape and the size and localization of your company.

# Our experience

Pearl is one of the largest SAP partners in Nordics and Baltics
